Full-stack SDE with hands-on experience building and shipping production web applications using MERN/PERN stack, RAG pipelines, and LLM integrations. Led a team delivering 5+ client projects; strong in DSA and backend system design. Seeking an SDE role to build impactful, scalable products.

## EDUCATION

### Kalasalingam Academy of Research and Education

*B.Tech in Information Technology* | GPA: 8

Tamil Nadu, India

Aug 2023 – May 2027

## EXPERIENCE

### Lead Developer

May 2025 – Present

*Freelance Team (Hybix Group)*

India

- Led a cross-functional team of 3–5 developers to deliver 5+ client web applications on schedule
- Designed RESTful backend architecture and API contracts, reducing integration errors across projects
- Introduced reusable component library and standardized Git workflows, cutting development time by 30%
- Managed full project lifecycle — requirements, sprints, code reviews, and production deployments

### Developer Intern

May 2025 – June 2025

*DrobospaceX Automation Private Limited*

India

- Built a full-stack applicant tracking platform using PERN stack (PostgreSQL, Express, React, Node.js) serving internal HR workflows
- Implemented OAuth 2.0 authentication and role-based admin dashboard with full CRUD capabilities
- Contributed to AR/VR training platform using Next.js and Three.js, enabling 3D interactive training modules

## PROJECTS

### Unitoids – AI Freelancing Platform | MERN, RAG, LangChain, FAISS, LLM

- Architected a RAG-based AI system using LangChain and FAISS vector store to match freelancers with relevant jobs via semantic search
- Built real-time query processing pipeline with LLM integration, reducing manual job-matching effort significantly
- Designed and deployed scalable Node.js backend with MongoDB, handling concurrent user queries and AI recommendation endpoints

### LinkED – Mentor Discovery Platform | PERN Stack, PostgreSQL

- Developed backend logic for skill-based mentor matching algorithm connecting students with relevant mentors
- Built automated resume generation and skill-assessment quiz system to help students track career readiness
- Designed normalized PostgreSQL schema with optimized queries for mentor search and user profile management

### BusApp – Smart Bus Alert System | IoT, Firebase

- Contributed to IoT-based alert system that notifies students via seat vibration and mobile push notification when their bus stop is near
- Integrated real-time location tracking with Firebase for live bus position updates

## TECHNICAL SKILLS

**Languages:** Java, JavaScript, SQL

**Frontend:** React, Next.js, HTML, CSS, Three.js

**Backend:** Node.js, Express, REST APIs

**Databases:** PostgreSQL, MongoDB, MySQL

**AI/ML:** RAG, LangChain, FAISS, LLM integration

**Tools & Concepts:** Git, OAuth 2.0, System Design, DSA, OOP

## ACHIEVEMENTS

- **Top 3** in Web Innovate competition – built and pitched a full-stack web product in a timed challenge
- Selected as participant in **Smart India Hackathon (SIH)** – one of India's largest national-level hackathons
- Active on LeetCode with consistent practice in Data Structures and Algorithms (arrays, Binary Search)

## COURSEWORK

- Data Structures and Algorithms, Database Management Systems, Operating Systems
- Computer Networks, Object-Oriented Programming, Software Engineering
