Summary

B.Tech Information Technology student (graduating May 2027) with strong fundamentals in **Java, Data Structures & Algorithms, OOP, DBMS, and SQL**, and **140+ Java DSA problems solved on LeetCode**. Full-stack development experience building **RESTful APIs and production web applications** using Node.js, Express.js, React.js, JavaScript, and TypeScript, with hands-on exposure to relational and NoSQL databases, authentication/authorization, and Agile/Scrum-based team collaboration.

Education

Kalasalingam Academy of Research and Education, Tamil Nadu, India

Aug 2023 – May 2027

B.Tech in Information Technology | CGPA: 8.02/10 | No Active Backlogs

Technical Skills

Languages: Java, JavaScript, TypeScript, SQL

CS Fundamentals: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks

Backend & APIs: Node.js, Express.js, RESTful API Design, OAuth 2.0, Service-Oriented Architecture

Databases: PostgreSQL, MySQL, MongoDB, Schema Design, Normalization, Indexing, Query Optimization

Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS

Tools & Practices: Git, GitHub, Agile/Scrum, Unit Testing, Debugging, Prisma, Firebase, Vercel

Experience

Lead Developer — *Freelance Team (Hybix Group)*

May 2025 – Present

- Led a team of 3–5 developers to deliver **5+ full-stack client web applications**, coordinating Agile/Scrum sprints, code reviews, and client requirements.
- Developed **RESTful APIs** using OOP-based backend architecture and standardized API contracts to improve frontend–backend integration across projects.
- Owned end-to-end delivery – requirements analysis, implementation, unit testing, debugging, Git-based collaboration, and deployment.
- Standardized reusable components and Git/GitHub workflows, reducing development time by approximately **30%**.

Developer Intern — *DrobospaceX Automation Private Limited*

May 2025 – June 2025

- Engineered a full-stack applicant tracking platform using **PostgreSQL, Express.js, React, and Node.js**, applying database normalization and OOP principles.
- Implemented **OAuth 2.0 authentication, role-based access control (RBAC), and CRUD operations** for an administrative dashboard.
- Built responsive UIs with **Next.js** and **Three.js** for an AR/VR training platform.
- Debugged frontend–backend integration issues through collaborative testing, contributing to on-time delivery.

Projects

LinkED – Mentor Discovery Platform | *PERN Stack, PostgreSQL*

- Designed a **skill-based matching algorithm** to connect students with mentors based on shared skill sets, improving match relevance.
- Built a normalized **PostgreSQL schema** with optimized, indexed queries for efficient mentor search and structured data retrieval.
- Built automated **resume-generation and skill-assessment quiz features** on a responsive React.js frontend integrated with the backend.

Unitoids – AI Freelancing Platform | *Node.js, MongoDB, LangChain, FAISS*

- Designed a **semantic matching system** using LangChain and FAISS to match freelance opportunities with candidates, reducing manual job-filtering effort.
- Built a **real-time query-processing pipeline** with LLM integration to improve job-candidate matching speed.
- Developed and deployed a **Node.js/MongoDB backend** with API endpoints supporting concurrent user queries and persistent data.

BusApp – Smart Bus Alert System | *IoT, Firebase*

- Implemented a **real-time proximity-alert algorithm** triggering seat vibration and push notifications as a bus approaches a student's location.
- Integrated **real-time GPS tracking with Firebase** for live bus-position updates and location synchronization.

Achievements

- Solved **140+ Data Structures & Algorithms problems in Java** on LeetCode, applying time and space complexity analysis to optimize solutions.
- Built and presented a working prototype at **Smart India Hackathon (SIH)**, advancing beyond the initial selection round.
- Placed **Top 3** in the Web Innovate competition, designing, developing, and pitching a full-stack web product under time constraints.
